SETTING NEW STANDARDS IN THE WORLD OF KITCHEN APPLIANCES

At Elgi ULTRA, we revolutionised the world of kitchen appliances with the launch of the first-ever sleek and innovative table top wet grinder in 1992, setting a new standard. And ever since, with our core values of innovation, quality and service, we have been presenting a wide range of kitchen appliances, including mixer grinders, wet grinders, pressure cookers and gas stoves, designed with unparalleled benefits for efficient and healthy cooking.

Our products are sturdy and built to last a lifetime, accompanied by the most competitive warranties in the market. At ULTRA, our core values - Health, Innovation, Technology, Durability, Quality and Service - ensure excellence in every aspect of what we do.

Elgi ULTRA strives to blend modern technology with culinary traditions winning the confidence of over millions of customers.

Wet Grinders

ULTRA Wet Grinders are built with quality materials for trouble-free and lasting performance, including durable motor, high-quality stainless steel drum, efficient patented conical stone designs and more which make them the best in the market!

COOKS FAST, SAVES GAS

ULTRA Optiflame Glass Top Gas Stove is designed using 8 mm thick toughened glass. It offers 70%+ gas efficiency in all burners. The burner unit assembly is optimised to generate more heat by burning gas efficiently, allowing for fast cooking without wastage.

Key Features

Forged Brass Burners - Stronger and more durable than regular brass burners.

Burner & Pan Support Locking - Individual locking for stability, safe stove lifting and easy cleaning.

Burner-Unique Pan Support - Each burner has a matching pan support size for better stability.

70%+ Gas Efficiency - Ensures faster cooking with less gas consumption.

SS 204 Cu Body - High corrosion resistance and durability, like SS 304.

Heat-Retardant Coating - Corrosion-resistant up to 650°C, supports up to 25 kg.

8mm ISI-certified Toughened Glass - Stronger and safer than 6mm glass.

Burner Layout - Designed to accommodate large vessels on all burners simultaneously.
